

“Universal cell” by Matthew Rirchie

Journal assignment#23 Modeling

Modeling

is...to make things smaller, life-sized or bigger, physical or mathematical, realistic or abstract. It is used to explain something that is difficult to experience easily.

It is important to **model** ...in every discipline. **Modeling teaches imaginative skills and insists on careful, intense observation.** It is important to initially shape material with your own hands.

Build your own!

Observe and...

- 1.Draw something** that is 3 dimensional
- 2.make a sculpture from existing materials or clay and then draw it or take a photo of it.**

Due: on your art day week of March 15, 2010

For your planning purposes, the last assignment will be Journal #30.

All journal assignments will be completed collected and reviewed the week of **May 15.**
